SUMMARY

Detail-oriented Software Engineering Technician student at Centennial College with a strong foundation in object-oriented programming, web development, and responsive design. Leverages a robust background in high-accountability industrial environments to bring exceptional problem-solving, time management, and cross-functional collaboration to technical projects.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, Java, React, HTML5, CSS3, Vite
- **Developer Tools & IDEs:** Visual Studio Code, Eclipse IDE, Git & GitHub, React Router
- **Databases & Design:** Oracle, Data Modelling, Draw.IO, UML
- **Core Competencies:** Responsive Web Design, Object-Oriented Programming (OOP), Debugging, Version Control, Technical Documentation

FEATURED PROJECTS

Personal Portfolio Web Application *(React, Vite, CSS, React Router)*

- Developed a fully responsive, multi-page personal portfolio website featuring custom branding, component routing, and dynamic navigation.
- Implemented version control best practices via GitHub and deployed the application to a cloud server environment (Vercel).

Enterprise Car Rental Management System *(Java, Oracle, Draw.IO)*

- Engineered a backend management system supporting user authentication, transaction booking features, and data reporting workflows.
- Applied object-oriented programming principles, abstract classes, and data modelling in Java.

Software Engineering Task Manager *(JavaScript, CSS, Draw.IO)*

- Designed a collaborative task-tracking utility tailored for development workflows, incorporating priority tagging, state management, and status filtering.

EDUCATION

- **Diploma in Software Engineering Technology (Online),** Centennial College — Expected Graduation / Ongoing (Started Sept 2025)
    - *Relevant Coursework:* COMP228 Java Programming, COMP229 Web Application Development, Discrete Mathematics.
- **Maintenance Millwright Technician Diploma,** Cambrian College, Greater Sudbury, ON — Completed 2014

PROFESSIONAL EXPERIENCE

Production Attendant / Associate *(Long-Term Roles)*

- **Dyna-Mig** (Stratford, ON) | 2018 – 2025
- **Levert Personnel & Total Personnel Solutions** (Greater Sudbury, ON) | 2013 – 2018
- Maintained high performance, rigorous quality control, and precision in fast-paced operational environments.

- Demonstrated exceptional time management and clear communication under tight deadlines and plant-wide maintenance schedules.
- Utilized strong analytical and troubleshooting skills to identify safety hazards, streamline procedures, and ensure strict compliance with operating standards.
